

Quality Service Charter

June 2026

Preamble

Primary Health Care (PHC) is committed to responding sensitively and effectively to the evolving needs of its clients. Over the years, PHC has continuously adapted its services, planned resourcefully, and redesigned care delivery to meet the diverse health needs of the communities it serves—communities that differ in culture, ethnicity, language, age, gender, values, beliefs, and, above all, in health requirements.

Driven by a talented and dedicated workforce, PHC has made significant strides in promoting client wellbeing. Through a strong commitment to innovative initiatives, it has consistently enhanced the quality of care by evolving from a traditional patient-centred approach to an integrated, person-focused care model—bringing services closer to clients and their communities.

A key milestone in this journey is the **Quality Service Charter (QSC)**. The QSC provides a vital framework that supports PHC in meeting its objectives and maintaining a high standard of service. It allows for the identification of overlaps, gaps, and potential challenges in service delivery, enabling proactive steps to enhance client satisfaction while also promoting a positive and fulfilling work environment for staff.

All PHC staff are expected to uphold and adhere to the principles outlined in the Quality Service Charter. Understanding and fulfilling these responsibilities is essential. Likewise, clients are encouraged to engage actively and uphold their own responsibilities. This spirit of mutual respect and collaboration ensures that the rights of all are protected, valued, and honoured.

This Quality Service Charter is complimentary to the Patient Charter, which may be accessed on this link: [Patients Charter_EN.pdf](#)

1. Who We Are & What We Do

We are the Primary Health Care, and we provide primary healthcare services for the population of Malta and Gozo. through our multiple sites distributed in different locations. Our mission states that:

The Primary Health Care's multidisciplinary TEAM is committed to excellence; to the highest possible level and quality of integrated primary health care service delivery, while we continue to explore new avenues to increase patients' accessibility further in the community.

Our services are accessible according to the time schedules included in this Charter. *If you are not sure how to access a particular service, you can always seek help by phoning the Client Support Centre on 21231231.* Our public health services/ clinics are physically accessible to persons with disabilities.

2. Customers

Our clients are the entire population. Health care services are free of charge at the point of use to Maltese citizens and refugees. EU citizens are entitled for free immediate care, such as, General Practitioner (doctor) service. Services can also be accessed by ineligible clients against a payment.

3. How to Reach Us

In view that Primary Health Care offers its services from various health venues on the Maltese Islands, Tables 1 - 3 provide useful information about these venues to help you access our medical, nursing, and other services delivered by health professionals.

For assistance you may call 'The Client Support Agent' on 21231231 to provide you with more information .

You may also refer to '**Our Services**' Section for more detailed information about our services.

Note

Child & Young People Services are offered by Mental Health professionals. For more information kindly access this link:

[Child and Young People's Services \(gov.mt\)](https://www.gov.mt/child-and-young-people-services)

Our services can be accessed in the following ways:

1. As an emergency
2. Walk-in patient in case of an immediate health need, or
3. By an appointment

Older persons (i.e., individuals aged 75 years and over) who present to PHC as emergency cases or walk-in patients with an immediate health need are given priority over other persons in the waiting area(s).

You may contact Primary Health Care for information on our services and how to access them by calling our Client Support Centre on 21231231 or visit our website at:

<https://www.primaryhealthcare.gov.mt>.

To access any of the PHC services you are required to present an identification document along with any other relevant records (e.g. referral ticket, record card etc.) The specific documents required are indicated with each service provided by PHC.

- **Maltese and EU citizens** must present their ID card/ Baby book.
- **Non-EU clients** must present at a copy of their pay slip the reception desk (with the option to cover salary and any other non-relevant details).

Minors under sixteen years must have the consent of a parent/legal guardian to receive a healthcare service/intervention. When a service user has reached the age of 16, s/he has the right to accept or refuse clinical attention/ care/ treatment, provided that the clinician feels that the client/patient has a sufficient level of maturity and understanding to do so. It is in your health interest to comply with the above to guarantee quality service by the clinician.

You may lodge a complaint/complement by contacting Customer Care on 25576100 or email it at customercare.phc@gov.mt Our website also has the facility of a suggestion box to help you communicate your complaint/complement.

Please note that all services previously offered at Paola Health Centre have now been transferred to the Vincent Moran Regional Hub

Services delivered by the Medical Practitioner

General Practitioner (GP) Service

GP service is offered from all the Health Centres and includes treatment and advice on any condition a patient/client may be suffering from. For emergency and immediate care no appointment is required to see the GP and the waiting time may be shorter outside the morning busy hours.

The service includes:

- Minor medical and surgical interventions
- First aid and basic life support in emergency situations
- Health Promotion advice and primary prevention
- Home visits if circumstances permit and are justified such as in emergencies, bedbound patients, the frail and severely disabled.
- Investigations (blood tests, urine tests, X-Rays, ECG) as considered necessary by the doctor
- Referral to a consultant by the General Practitioner if necessary.

Note: Medical certificates for absence from work are issued from 8am to 11am except for shift workers in which case a certificate may be issued at any time before their shift is due to start.

Table 4 illustrates the times when GP service is available at the Health Centres.

Documentation:

It is **very important** that a Maltese person or a European citizen presents his/her Identification Card, while a non-European citizen who resides in Malta must present his/her pay slip/ FS3/ working permit and passport.

Victoria (Gozo)	Monday to Sunday & Public Holiday	8:00am to 8:00pm	From 8.00pm to 8.00am all clients/ patients can go to Gozo General Hospital (GGH)

The GP service is also offered in the Community Clinics (Bereg) that are distributed in different localities throughout Malta and Gozo. This service is by appointment and provides basic medical caring services. Complicated medical issues are best dealt with at the health centre as time is very limited here. For more information, please refer to Table 4.

GP home visits are offered to clients/ patients only if circumstances permit and are justified such as in emergencies, bedbound patients, the frail and severely disabled. For home visits, when possible, please phone before 9:00am, giving us the following details:

- Your name and age
- Your address with clear directions/landmarks
- Your ID card number
- Your telephone number
- Some details on your condition.

An adult, preferably one of the parents/guardians, should be present when the doctor is called to examine a child.

When calling, our operator may forward your call to the doctor to give further details.

In an emergency, please keep calm and before you hang off make sure that the operator/doctor has **ALL** the details.

GP Appointment Clinic (GPAC)

The **GP Appointment Service** has been running since 2021 in the Community Clinics within various localities in Malta and is being extended in the Health Centres. The aim of this service is to provide high quality consultation time during which clients can discuss their various issues, which are normally dealt with by a GP.

It is an appointment-only clinic and apart from offering high quality consultation time, the clinic also serves to foster follow up and early detection of various ailments. **Any adult person can fix an appointment for this clinic by calling on 21231231.** The service is not run on public holidays. You may refer to Table 6 for more information.

Long Covid Clinic (LCC)

The Pandemic which affected the world in 2020 left repercussions. One notable repercussion is the Long Covid Syndrome, which is experienced by a minority of patients with COVID. In this respect, PHCD has, as of May 2022, initiated a Long Covid Clinic (LCC) to follow-up these patients accordingly.

The LCCs are held in three community clinics, namely Mellieha, Pieta and Marsaxlokk Community Clinics. Clients are either referred from other professionals or they can make an appointment themselves. The LCC is part of the GPAC. Besides offering follow-up of patients with Long Covid, this clinic allows for patients to be referred to the necessary channels if the need arises.

Twilight Appointment Clinic

The service offered from the Twilight Clinic is by appointment, uniquely available to support the streaming process at Mosta HC (Table 6). Patients deemed to benefit from an appointment-based service will be directed from the walk-in service to this clinic.

The service is run by GPs employed within Primary Health Care.

Documentation:

The documentation needed for the clinic is entirely on the EPR system currently employed within Primary Health Care.

Table 6: Twilight Appointment Clinic

Health Centre (HC)	Weekday	Time	Note
Mosta	Monday to Friday	2:00pm – 8:00pm	If a public holiday falls on a weekday, the clinic will remain closed.

Adult Down Syndrome Clinic

The Adult Down Syndrome Clinic (ADSC) is a clinic intended for individuals with Down Syndrome aged 16 years of age and above. The ADSC team is composed of a Specialist in Family Medicine and Nurse/s allocated to run the clinic. The clinic focuses on the needs of adults with Down Syndrome and serves as a focal reference point of support for clients, their careers, and their caring physicians.

Service is given at Zabbar Community Clinic and Hamrun Community Clinic by appointment (Table 7).

Referral to the clinic may be through self-referral, the caring General Practitioners and/or caring institutions and Non-Governmental Organisations by e-mail to adsc.phc@gov.mt or calling 21231231

Documentation:

Identification card/ Baby book and an Appointment Letter/ Appointment by SMS and Treatment Card/ Schedule V

Hamrun	Tuesday (every fortnight) Saturday (every five weeks)	1:00pm - 5:00pm 8:00am - 1:00pm

Diabetes/ Specialty Clinic

The Diabetes Clinic caters for patients with diabetes. Here, the patients are monitored for their chronic condition and its complications. Diabetes Care is a multidisciplinary professional team approach, mainly Doctors, Nurses, Podiatrists and Ophthalmologist. Patients are seen against a standard protocol which includes that all patients undergo yearly, comprehensive foot screening by a podiatrist at their respective Health Centres. If pathology is detected, the patient is subsequently referred for vascular assessment, with the possibility of further specialised assessment by a vascular surgeon if necessary. They also undergo yearly screening for Diabetic retinopathy in addition to an annual ophthalmic referral for full assessment by Ophthalmologists.

Referral is by a GP or from the Diabetes Clinic at Mater Dei Hospital. An appointment is required to attend the Diabetes Clinic and the Specialty Clinic. For more information on the opening times of the Diabetes Clinic, kindly refer to Table 8.

Documentation:

Identification Card, Referral Ticket by GP for new cases, Appointment letter/ Appointment by SMS, Treatment Card.

Ear syringing

Ear syringing is carried out to remove wax from the ear using water. It is important that the client/ patient applies the treatment prescribed to him/her and follows the directions given by the doctor prior to ear syringing. This service is by appointment and offered from the Health Centres as shown in Table 9.

The client/patient needs to inform the doctor if:

- You have a perforated ear drum.
- You suffer from peanut allergy or any other allergy.
- You have a grommet (a small tube inserted by an ear specialist in your eardrum).
- You have been operated on the ear in the past.
- You suffer from vertigo (dizziness caused by problems originating from the ear balance mechanism).
- You are suffering from an ear infection.
- You have any other ear condition the doctor should know.
- You feel pain/dizziness at any time during the procedure.

Documentation:

Identification Card. Prescription Note and/or Referral Letter by GP.

Table 9: Ear Syringing

Medical Consultant Clinic (MCC)

The patients eligible for this medical consultation are those referred by the general practitioner (GP), either from the Health Centre or their private GP. An appointment is required for this clinic. Waiting time for an appointment is very variable and varies from one Health Centre to another, depending on the demand in the catchment area. For more information regarding the opening times of the MCC, kindly refer to Table 10.

The Medical Consultation Clinic entitles you to

- Provision of consultant medical opinion
- Referral to Schedule V clinic
- Access to all specialized investigations at Mater Dei Hospital, example CT scans, MRI, Echocardiographs, etc.

Documentation:

Identification Card, Schedule V Card (if available), Appointment Card/ Appointment by SMS and in the case when you are attending the clinic for the first time a Referral Ticket by a GP is also needed.

Ophthalmic Services

Primary eye care is the essential building block for prevention and monitoring of eye-related condition in our community. The **Primary Eye Screening Centre of Excellence**, located at Floriana Health Centre, is currently and temporarily situated at Gzira 2. The clinic provides a high quality holistic primary eye care, run by our highly trained healthcare professionals. Services offered from the Centre of Excellence include:

- **Refraction Clinic**
A qualified optometrist will check your eyesight and may prescribe spectacles if indicated.
- **Glaucoma Screening**
If detected early, glaucoma usually can be controlled, and severe vision loss prevented. Through this service we aim to detect glaucoma at an early stage, preserving the quality of life.
- **Glaucoma Clinic**
This service runs specifically for individuals already diagnosed with glaucoma and offers periodical eye monitoring.
- **Diabetic Retinopathy Clinic**
This service is specifically designed for diabetic patients and is part of a holistic approach for the early detection of diabetes-related complications.
- **Adult and Children Optometry Clinic**
This service is delivered to clients according to a schedule illustrated in Table 11

Clinics are also available from the other Health Centres as indicated in Table 11.

You can be referred to the ophthalmic services by your private doctor, the Health Centre doctor, Diabetes Clinic or the hospital. School children may be referred by the School Health Services. For glaucoma screening, self-referral is also acceptable. Eye care services are by appointment.

Documentation:

Identification Card, Pink Form (if available), Schedule V Form (if available) and Referral ticket to attend the Refraction Clinic.

	Optometry	Friday	8:00am – 2:30pm	By appointment

Point of Care (POC)

This clinic is intended for patients that need treatment with warfarin for a very long time due to their medical condition. Patients may now benefit from INR testing in specialised clinics set up in the health centres themselves. During the visit, INR testing is done from a very small amount of blood taken from one of the fingers. The machines in use give the result in a few seconds. One may discuss any problems or queries with the doctor and is also given a prescription for warfarin there and then.

Patients that are chosen to make use of this service are the ones that have a stable INR level. They may not be suffering from any condition that may give rise to large variations in the INR reading. This service is given by appointment and provided from the health centres as in Table 12.

Documentation:

Documentation includes Identification Card and the Yellow ACC booklet

Table 12: POC Clinic Times

Health Centre	Day	Time
B'Kara	Tuesday & Thursday	8:00am – 10:20am

Victoria (Gozo)	Tuesday & Thursday	8:00am – 1:00pm

Schedule V Clinic

The clinic is attended to by a Medical Consultant. You may attend this clinic if you are entitled for free medication for the treatment and control of chronic medical conditions as listed in the Schedule V of the Social Security Act, and you need to either change the medical treatment or add new treatment to your medication list. Attendance to this clinic is by an appointment.

For changes or additions to medication related to High Blood Pressure and High Cholesterol, you may speak to the General Practitioner at your nearest Health Centre (as a walk-in) or Community Clinic (with an appointment).

Schedule V cards issued from the Departments of Surgery, Gynaecology, Ophthalmology and Psychiatry at Mater Dei Hospital can only be renewed by the same Department and cannot be renewed at the Health Centre.

If you are still attending the Medical Outpatients Clinic at Mater Dei Hospital on a regular basis, your Schedule V card issue and renewal should be obtained from your consultant at the Medical Outpatient and not from the Health Centre.

For more information regarding the opening times for the Schedule V Clinic, kindly refer to Table 13.

Documentation:

Identification Card, Schedule V Card (if available), Appointment Card/ Appointment by SMS and in the case when you are attending the clinic for the first time a Referral Ticket by a GP is also needed.

Mosta	Tuesday	12:00MD – 1:00pm

Scoliosis Review Clinic

The Scoliosis Review Clinic offers a follow-up service for children and adolescents identified as showing signs of mild Adolescent Idiopathic Scoliosis during screening. The GPs running the clinic regularly review children flagged as having mild Adolescent Idiopathic Scoliosis which by definition is considered to start at 10 years of age. This clinic takes place at Tarxien Community Clinic on Tuesdays and Thursdays in the afternoon. Referrals to this clinic are made by doctors and nurses from the School Health Service following scoliosis screening in schools, as well as by doctors from Health Centres or private practice. In case of queries phone the Client Support Unit on +356 21231231 or send an email on schoolhealth.phc@gov.mt

Documentation:

Identification Card (if available)/ Parent/Guardian Identification Card and Referral Ticket

Well Baby Clinic – 1st and 2nd visit

The Well Baby Clinic (WBC) serves the purpose of clinical examination and developmental assessments of babies and infants. To achieve this purpose, three routine visits are carried out. Doctors from the Primary Child Health Unit carry out Well Baby Clinics in all Health Centres according to a pre-planned timetable.

The first visit: Parents of babies born at MDH will receive an appointment for the well-baby check-up at 8-12 weeks of age. This is combined with an appointment at the Immunisation Clinic for the first doses of vaccine according to the National Immunisation Schedule. This service is also offered to babies born in private hospitals or at home. In such cases, parents may phone the Client Support Unit on +356 21231231 or send an email on wellbabyclinic@gov.mt requesting an appointment.

The second visit: Parents who attended with their babies at the WBC for the first visit, are contacted and asked if they wish for their child is assessed again at 8 months of age for the second check-up. If the answer is positive, a second appointment will be given.

Documentation:

Baby Book (given at the post-natal wards), Mother’s antenatal card (Blue Card), Parent/Guardian Identification Card or Passport and the Appointment letter/ Appointment by SMS

Well Woman Clinic

The aim of the Well Woman Clinic is to offer a professional service within the community which is both accessible and efficient. This aim is achieved by offering four main categories of services namely: Gynaecological service, antenatal care, postnatal care and aiding with the National Cervical Screening service.

Documentation:

Gynaecology Clinics: Identification Card and Referral Ticked by a GP.

Antenatal Clinics / Postnatal Clinics : The Identification Card and the Antenatal Card (blue card).

Health and Well-Being Clinic

The Health and Well-being clinic offers clients the opportunity to consult with a doctor in the community about issues related to genitourinary medicine. The clinic aims to promote the client’s overall health and well-being, by offering investigations as well as counselling and health promotion interventions. Details of the service are available in Table 14.

Table 14: Health and Well-being Clinic

Services delivered by the Nursing/ Midwifery Team

Assessment of Well-being Clinic

This clinic aims to provide a holistic assessment of the client (18 years of age and older) to educate and empower client to a healthier lifestyle through health promotion, health checks and disease prevention intervention. The scope is to identify the risk factors conducive to ill health, identify undiagnosed existing health issues, educate, and provide access to an integrated multidisciplinary primary health care team for better continuity of care. The clinic acts as the natural focal point for these networks. In addition, the nurse-led clinic supports the most common chronic diseases and conditions such as hypertension and diabetes. For more information refer to Table 15.

Assessment of Well-Being Clinics is carried out within the Community Clinics on appointment basis. To set an appointment you may phone the Call Centre at 21231231 or 21222444, or email customercare.phc@gov.mt.

Documentation:

Identification Card and Schedule V document.

Valletta	Sunday every 4 weeks	By appointment 7:30am – 11:00am
Zabbar	Sunday every 4 weeks	By appointment 7:30am – 11:00am

Fibromyalgia Clinic

One finds this clinic at Floriana Health Centre and patients are referred to this clinic by an appointment from Mater Dei Hospital. The clinic opens every Friday from 1:30pm to 5:30pm.

Documentation:

Identification Card/ Baby book.

Immunisation Services

An Immunisation Clinic can be found in every Health Centre from where immunisation services to children are offered from 6 weeks to 16 years of age. **This service is by appointment.** A Schedule of the opening hours is at Table 17.

Documentation:

The Baby Book and parent/guardian Identification Card.

Travelling vaccinations and advice are also offered to travellers from the Immunisation Clinics at Floriana and Victoria (Gozo) Health Centres.

In case of children and adolescents, the Baby Book and the Identification Card of the parent/guardian are required. In case of adults the Identification Card and Immunisation Records are required.

Midwifery Services

The midwifery services include the Maternal Health Clinic Screening and Advice as well as the Parent and Baby Primary Health Support Clinic.

The Maternal Health Clinic Screening and Advice: This clinic provides an antenatal and postnatal midwifery service to women prior to their check-up by the obstetrician. Women's personal health assessment, health promotion and helping women to maintain a healthy lifestyle are important matters discussed during this appointment.

Parent and Baby Primary Health Support Clinic: This is a midwife-led service offering essential support to new parents in the early weeks after childbirth. Personalised one-to-one midwifery consultations covering infant feeding, sleep, bonding, maternal recovery, and emotional well-being is provided. New parents in the community - typically within the first few weeks following childbirth may call this clinic as follows:

- For advice given by the midwife directly over the phone

- Or alternatively, the client may opt to attend the clinic in person, in which case an appointment is scheduled as necessary.

Moreover, mothers who undergo Caesarean section at Mater Dei Hospital (MDH) and require removal of sutures are given an appointment from the postnatal wards at MDH to attend this clinic

Contact numbers: +356 21231231/+356 79500176

A midwife will talk to you and if necessary arrange for a visit at the Health Centre. The service is available daily including Saturdays and Sundays from 7am till 3pm.

Documentation:

For both Clinics: The Identification Card and the Antenatal Card (blue card).

Plaster Service

Plaster application may be advised by the Health Centre General Practitioner following an X-Ray. Plaster service is delivered according to schedule at Table 18.

Table 18: Plaster Application opening schedule

Health Centre	Day	Time

Port-a-cath management Clinic

The client is referred to this service by the Senior Practice Nurse, Sir Anthony Mamo Oncology (SAMOC). Subsequent appointments are made at the Health Centre. This service includes the maintenance of port-a-cath by flushing the catheter to ensure patency of the line. Service is provided by appointment to all patients from the Health Centres shown in Table 19.

Documentation:

Information booklet provided from SAMOC.

Dr. Livori/ Dr. Grixti (surgical)	Thursday	3:00pm – 12:00MD
MDH Consultant (surgical)	Friday	7:30am – 12:00MD

Treatment Room Services

Due to the busy schedule of services that are delivered daily by nurses from the *Treatment Room* (for opening times see Table 1), different time slots are given to patients/clients to manage more resourcefully the various services. Services provided by the nursing staff in the treatment room are: Administration of injections, wound care/removal of sutures, venepuncture, application of Plaster of Paris and emergency services, including nebulizer therapy.

It is therefore very important for a client/ patient accessing a specific service at the Treatment Room to comply with the appointment given. In case of any query one can always phone the Client Support Centre for further assistance.

Information about the Prevenar vaccination (only given to adults 65+), Influenza and Covid-19 booster doses to adults is illustrated in Table 21.

An emergency case may need the assistance of a GP. For this reason, it is also important to note the times when the GP is on duty at the Health Centre (see Table 4).

Documentation:

Identification Card/passport, Discharge Letter (if available), Treatment Card/Discharge referral letter (if followed up from Tissue Viability Clinic or Dermatology MDH), doctor referral note (for administration of injection etc).

Nutrition and Dietetic Unit

Nutrition: Nutrition services are offered to promote healthy lifestyles throughout the lifecycle. An appointment is required to access this service. For an appointment with the nutritionist, kindly send an email to nutritionist.cmrh@gov.mt or phone on 23176000. For more information about the service see Table 26.

Documentation:

Referral Ticket by a dietitian.

Table 26: Provision of Nutrition sessions

Locality	Day	Time
Vincent Moran Regional Hub	Monday to Friday	7:00am – 3:15pm

Dietetics: Our dietetic services are provided through individualized consultations focused on delivering evidence-based nutrition and dietetic interventions. Each meal plan is tailored to the patient's specific dietary requirements, medical conditions, and cooking abilities to promote long-term, sustainable health outcomes. Emphasis is placed on patient education, empowering individuals to make informed dietary choices. Follow-up sessions are conducted to monitor progress, adjust meal plans as needed, and provide ongoing support for achieving health goals.

The clinic is run by an appointment system.

Documentation:

The Identification Card and referral ticket by GP.

Referral can be made by a GP and the Diabetes Team. For more information please refer to Table 27.

Podiatry Service

Podiatry services focus on the preventive care and treatment of foot conditions. The Centre of Excellence Podiatry Services offers core podiatry services to the residents of the Birkirkara Health Centre catchment area and specialised services to all Maltese residents. Specialised services include:

– **Biomechanical Assessment and Gait Analysis Clinic**

This clinic offers a detailed assessment of the biomechanics of the lower limb and gait analysis through visual and computerised means.

– **Lower Limb Vascular Clinic**

A thorough vascular assessment is carried out to patients with the aim to diagnose and manage peripheral arterial disease. This service is offered in collaboration with the vascular team at Mater Dei Hospital.

– **Nail Avulsion Surgery**

A dedicated clinic for the treatment of pathological nails which require nail avulsion.

– **Podopaediatrics Clinic**

A specialised clinic dedicated to the examination and treatment of children with foot problems. Children under 16 years of age can attend this clinic accompanied by an adult.

– **Rheumatology and Musculoskeletal Podiatry Clinic**

A specialised clinic to prevent and manage foot problems secondary to rheumatology and musculoskeletal conditions.

– **Diabetic Foot Screening**

People living with diabetes are screened routinely to prevent, diagnose, and manage early signs of diabetic foot complications.

– **Claudication Clinic**

Intermittent claudication is the main symptom of vascular disease in the lower limb and is associated with the risk of cardiovascular disease and lower limb deterioration. In this clinic, patients with this symptom undergo a thorough vascular assessment and are enrolled in a monitoring program to ensure timely fast-track referral to the Mater Dei Hospital Vascular Surgery Unit, when required. The ultimate goal of this clinic is to decrease the risk of limb loss. Referral for this clinic can be implemented by general practitioners, podiatrists, and other health care professionals.

– **High-Risk Foot Biomechanics Clinic**

In this clinic, patients with diabetes at risk for foot ulceration and patients with rheumatoid disease with severe foot deformity, undergo a detailed biomechanical examination with the aim of preventing tissue loss and amputation. Referral for this clinic can be implemented by general practitioners, podiatrists, and other health care professionals.

Services are also offered by appointment from the other health centres and various Community Clinics. Details of services delivered from the health centres are available in Table 29.

Documentation:

The Identification Card and a Referral Ticket when attending to the vascular clinic and the Identification Card/ Baby Book if attending to the paediatric clinic.

Speech Language Centre

These services focus on development and/or acquired difficulties related to communication, language and swallowing difficulties. Services also cover the national LENTI screening for Autism. SLP services are offered on an open-referral system and by appointment and delivered from various sites, such as, Health Centres, Community Clinics (Bereg), schools or in the home as recommended by the speech language pathologist. Such services include:

- Language delay and impairments;
- Difficulties in speech production (articulation, phonology and intelligibility);
- Communication difficulties associated with hearing and sensory impairments;
- Communication problems associated with learning disability, autism spectrum disorder and syndromes;
- Fluency problems

- Reading and writing difficulties related to specific learning difficulties;
- Voice disorders, including dysphonia and laryngectomy;
- Neurological conditions (e.g. head injuries; stroke and conditions such as Parkinson’s, Huntington’s and Dementia);
- Swallowing difficulties (both children and adults).

For opening hours of services delivered in the *Health Centres* refer to Table 31. For opening hours of services delivered in the *Community Clinics* refer to Table 4.

For services in Public schools and Church schools, one can approach the SLP in the nearest clinic and will be directed accordingly

Documentation:

Identification Card/ Baby Book and Referral Ticket.

Services delivered by a Multi-professional Team from PHC

Bloodletting Service (venous)

If you are undergoing investigations and you need blood tests, then you are eligible for this service. Clients/ patients must have the blood investigation requests already ordered by their private general practitioner, Health Centre general practitioner or from hospitals. You need an **appointment** to access this service.

This service is also offered to patients on anticoagulant treatment such as warfarin.

You will find more information about this service at Table 32, 33 and 34.

Documentation:

- *Blood investigations:* Identification Card and Referral Letter from a GP
- *Patients on anticoagulant treatment:* Identification Card and Anticoagulant Booklet

Table 32: Bloodletting time schedules (by nurses) in the Health Centres

Health Centre	Service	Day	Time
B'Kara	Blood investigations and INR Paediatric Venepuncture	Monday to Saturday	7:15am – 9:00am

Community Clinics	Service	Day	Time
M'Skala	Blood investigations	Monday & Friday	7.30am-1.30pm
M'Xlokk	Blood investigations	Tuesday to Thursday Alternate Saturdays & Sundays	7.30am-1.30pm 7.30am – 11.30am
Mellieha	Blood investigations	Tuesday to Friday Alternate Saturdays & Sundays	8.00am – 1.50pm 8.00am-11.30am
Tarxien	Blood investigations	Wednesday	7.30am -1.30pm
Zabbar	Blood investigations	Monday to Wednesday & Friday Alternate Saturdays & Sundays	7:30am – 2.00pm 7.30am-12.30pm

Obesity Clinic

The Primary Health Care Obesity Clinic operates from Vincent Moran Regional Hub (VMHR). Adults with body mass index 30.0 – 34.9Kg/m² are managed by a multidisciplinary team including a General Practitioner with special interest in obesity and weight management, a Dietitian, a Nutritionist, a Physiotherapist and a Psychotherapist. Referral pathways are being finalised. There is investigation and management of aetiology and obesity-related comorbidities, motivational interviewing, diet and exercise programmes including classes, and psychotherapy. We are living in exciting times for obesity and weight management because for the first time we have effective weight loss drugs available. Patients benefit from at least 14 appointments in 6 months, after which they are discharged to a Nurse-led Wellbeing and Opportunistic Screening Clinic in the community clinics. A multidisciplinary team meeting is held every 3 months. Patients with eating disorders are referred to Dar Kenn Ghal Sahhtek and patients can also be referred for bariatric surgery. Further information is available in Table 35.

Table 35: Obesity Clinic

Location	Day	Time	Note
Vincent Moran Regional Hub	Monday & Wednesday	9:00am – 1:00pm	By appointment

Telemedicine Services

Primary Health Care (PHC) has set up a new Telemedicine service in March 2020, to provide accessible, safe and continuous medical care to the community. This service operates 24 hours a day, 7 days a week. The Telemedicine Centre is currently situated in a dedicated facility in Siggiewi, co-located with the Primary Health Care Client Support Centre (CSC), allowing both entities to work in synergy to maximise client service.

Clinical Service

This remote clinical service is delivered by a team of General Practitioners (GPs) and GP trainees. The doctors communicate with patients who have been registered, over the telephone, on the PHC Electronic Patient Record (EPR) by the CSC agents. During the daily consultations, doctors provide general medical advice, medical guidance regarding patient symptomatology, assess and coordinate domiciliary visit requests in collaboration with Health Centre doctors, and also address all health needs of patients while guiding them to access all services currently available in our community. They can also request certain investigations and provide information about investigation results, when this is clinically indicated, such as in cases where these investigations were previously ordered by Health Centre doctors. Frequent GP medical support is also provided in relation to clients in various residential homes, including homes for the elderly in our community.

In addition, the Telemedicine team works closely with laboratory services at Mater Dei Hospital. Doctors are promptly informed of significantly abnormal results to ensure timely patient contact and appropriate escalation of care.

Virtual Consultations

Where appropriate, video consultations may be conducted using secure platforms such as Microsoft Teams and WhatsApp Business. This offers a safe visual aid to our medical consultations, enabling a more holistic service while enhancing clinical assessment and communication and maintaining patient confidentiality.

Clinical Governance and Documentation

All medical consultations are fully documented in the EPR, and aim to follow structured, evidence-based GP-consultation models to ensure consistent, high-quality care. GP trainees receive dedicated training in both face-to-face and virtual consultation methods. Current activity levels (2025/2026) show that up to 350 medical consultations are conducted over 24 hours.

Supporting Community Care

The PHC Telemedicine Centre has thus become an important GP tool complementing face-to-face consultations in caring for our patients, while potentially offloading physical health centres in the process. It enhances access to medical advice, supports continuity of care, and helps reduce pressure on health centres, while maintaining patient and staff safety.

Contact Information

Patients can access the service by contacting the PHC Client Support Centre on:

- 21231231
- 21222444

This PHC service is available 24 hours a day, Monday to Sunday.

This is not an emergency service. To contact emergency services, one should phone 112. If one is unsure whether the situation is an emergency, one can phone 1400.

Special Units

Community Oncology Survivorship Clinic

This is a community clinic for patients who have had recovered from Cancer but require monitoring to detect early recurrence. As more patients live beyond cancer, their needs are often better met by a community GP who can treat patients beyond just the detection of cancer recurrence.

Patients are referred by their oncologist to specifically trained GPs, according to agreed protocols. Refer to Table 36 for more information about this clinic.

Table 36: Community Oncology Survivorship Clinic opening schedule

Locality	Day	Time
Attard Community Clinic	Alternate Wednesday	1:30pm – 5:00pm
Fgura Community Clinic	Alternate Thursday	8:00am – 1:30pm

Migrant Health Clinic

The COVID-19 pandemic has shed new light onto the health needs of migrants who are stationed in Malta's Detention Centre. Realising their health needs went beyond COVID-19, complicated by an increased difficulty to access community services due to their deprivation of liberty, Primary Health Care supported the establishment of the Migrant Health Service (MHS).

The MHS does initial reception health screening, quarantine and thereafter follow-up for any additional health needs and chronic conditions. Furthermore, it has forged alliances with Public Health, GU clinic and mental health services to provide a holistic approach to the needs within this new outreach for Primary Care.

This has led to adequate pathways for the provision of health in an otherwise inaccessible environment, slashing down inappropriate referrals and reaffirming the commitment of Primary Health Care to provide its services to all corners of society.

Migrant Health Liaison Office

This office was established in view of the large influx of irregular immigrants arriving to Malta. The aim of this office is to help the migrants orientate themselves to our health care system to be able to seek support for their health needs, overcome language barriers and other challenges.

The objectives of the unit are:

- Liaising with government departments, agencies and other entities to address issues pertaining to migrant health
- Provision of health education sessions to migrants in open centres and in the community
- Assisting migrants in accessing health care through the right channels
- Delivery of the Training Programme for Cultural Mediators in Health Care
- In-service studies
- Education and training for health and social care professionals and university students on the topic of Cultural Issues in Health Care, Female Genital Mutilation, human trafficking, etc.
- Provision of translated materials (booklets and posters) for migrants on health topics
- Participation in EU programmes, seminars and workshops on the issue of migration and health
- Protecting girls at risk of FGM by providing the International Protection Agency (IPA) with evidence that girls coming from FGM prevalent countries have/have not been subjected to FGM. In the case that a girl has not been subjected to FGM a medical certificate will be issued for IPA to consider her case carefully as the girl will be at great risk of FGM if she will be sent back to her country of origin in case her claim for asylum will be rejected.

National Screening Centre (NSC)

The National Screening carry out screening for breast cancer, colorectal cancer, cervix cancer and abdominal aortic aneurysm (AAA). The clients are identified and contacted to participate in the screening programme by the Centre. For more details, please visit our website at <https://www.primaryhealthcare.gov.mt> Table 37 shows how the National Screening Centre operates:

Documentation:

Identification card, Driving Licence or Passport for Maltese and EU citizens.

Table 37: Screening schedule

Screening	Health Centre	Service	Day	Time
Breast Screening	National Screening Centre	Mammogram Clinic	Monday to Friday	7:30am – 2:45pm
		Recall clinic	Wednesday Thursday	From 1:00pm onwards From 9:00am onwards
Colorectal Screening			Monday to Friday	7:30am – 2:45pm
Cervical Screening	B'Kara		Alternate Friday	11:00am – 12:00MD
	Floriana		Tuesday	11:00am – 12:00MD
	Gzira		Monday	11:00am – 12:00MD
	Gozo General Hospital		Tuesday	12:00MD – 1:00pm
	Kirkop		Thursday	11:00am – 12:00MD
	Mosta		Monday Tuesday	11:00am – 12:00MD 12:30am – 2:00pm
	Paola		Wednesday Thursday	11:00am – 12:00MD 12:30pm – 2:00pm
	Qormi		Alternate Friday	11:00am – 12:00MD

The National Screening Centre also offers Abdominal Aortic Aneurysm (AAA) screening to men aged 65 years and over. On their 65th birthday, male clients will receive an invite from the NSC for the screening. Those over 65 years who were not invited can call on **21227470** or **21227471** and make an appointment or send an email on aaa.screening@gov.mt The screening test is carried out at Hamrun Community Clinic and Gharb Community Clinic.

Documentation:

Identity card, medication list.

Occupational Health (Medical) Unit

This Unit provides a medical service to public service employees (governmental, ministerial, corporations and authorities). Appointment to access the service must be done through direct request to the OHU on 21231231 by the responsible and authorised relevant office. Service provision request from the Private Sector/ individuals is not accepted. The Unit, which is situated at Qormi HC opens from **Monday to Friday** between **8:00am and 1:00pm**.

Occupational Health (Medical) Unit Gozo opens on **Wednesday and Thursday** from **12:00MD to 6:00pm**.

Documentation:

Identification card/ Baby book.

Pharmacy

There are two pharmacies which are situated at Floriana and Paola within the respective Health Centre (Table 38). Clients can opt to go to the pharmacy of their preference. All Schedule 2 holder (old pink card), staff, armed forces and Third Country Nationals can be supplied with acute treatments. New Schedule V holders can be provided with one-month supply of medicine, if not yet registered with a private pharmacy, on a one-time basis only.

Documentation:

Identification card, new Schedule V, valid Schedule 2, POYC vouchers and prescriptions.

Table 38: Pharmacy opening schedule

Health Centre	Day	Time
Floriana	Monday to Friday	7:45am – 2:00pm
	Saturday	7:45am – 12:00MD
Vincent Moran Regional Hub	Monday to Friday	7:45am – 2:00pm
	Saturday	7:45am – 12:00MD

School Health Service

The School Health Service consists of a team of doctors and nurses who provide monitoring of primary child health and well-being as well as preventive care services in all State and Church Schools in Malta and Gozo.

The emphasis is on the early detection of developmental, growth, sensory and learning problems as well as physical disorders. To this end, pre-school entry development assessments are carried out before school entry, that is, at pre-Kindergarten level. These initial assessments, which are carried out in the parents' presence, involve taking a medical and family history, conducting a language and social development assessment, height and

weight measurement, as well as checking of vaccination records. Following this, further assessments and services are carried out throughout the primary school years. These include vision screening in Year 1, Year 3 and Year 6; colour vision testing in Year 6 and scoliosis screening of girls in Year 6. The team will also address any health, development and/or behavioural concerns brought up by you or the school authorities concerning your child. No assessments will take place without the prior consent of the parents.

The Youth Health section is an extension of the School Health Service into Secondary Schools. The services offered are screening for scoliosis for students who are in Year 8 and Immunisation of Year 10 students with the booster dose of Diphtheria, Tetanus and Polio vaccine and the Meningococcus ACWY vaccine. Services proceed only once parental consent has been obtained.

This service is coordinated directly between the SHS staff and your child's school; parents receive details via school communications.

Documentation:

Baby book, Consent Form from parent/ legal guardian, any other relevant documentation.

The Mental Health Resilience Programme

The Mental Health Resilience Programme (an Assisted Self-Help initiative) is being offered by the Health Promotion and Disease Prevention Directorate in collaboration with Primary Health Care. This programme has been established to ensure patients with mild anxiety and depression in the primary care setting can be supported through psychoeducation and skills development.

The Resilience Programme is a free, 7-week group programme delivered by an HPDP psychologist, providing participants with practical tools to enhance self-awareness, regulate emotions, challenge unhelpful thinking patterns, and build supportive relationships.

The group programme will be held in the evenings at Qormi Health Centre, starting from 12th November 2025.

Patient may be referred to this programme by the Primary Health care general practitioners.

Cardiology Clinic

The Cardiology Clinic within the Health Centres is an outreach of the Mater Dei Hospital Cardiology Department. The clinic is run by Cardiology Specialists as an extension of their Outpatients work. At present the Cardiology Clinic takes place in Mosta Health Centre. The clinic is usually run on Monday and Tuesday between 8:00am and 12:00MD. Temporarily it is only available on Monday.

Chest Clinic

The Chest Clinic is organised and managed by professional staff from the Public Health Unit and is situated at Floriana Health Centre. Patients require an appointment to be seen. For further information contact the Public Health Unit by accessing links below:

<https://deputyprimeminister.gov.mt/en/health-promotion/idpcu/Pages/chest-unit.aspx>
<https://deputyprimeminister.gov.mt/en/health-promotion/idpcu/Pages/introduction.aspx>

Documentation:

Identification Card, Treatment Card and Referral Ticket.

Neurology Clinics

The Neurology Clinics within Primary Health Care are run as an outreach service of the Mater Dei Hospital Neurology Department. The clinic is run by various Neurology Specialists as an extension of their Outpatients work and are run through both Health Centres and Community Clinics to allow for better community integration of services.

Orthopaedic Clinic

The orthopaedic clinic caters for various musculoskeletal complaints and is clinically operated by orthopaedic consultants. At the clinic, joint infiltration treatment to treat inflammation and relieve pain is also administered. The patient may require follow-up sessions if deemed necessary by the specialist. Orthopaedic sessions are available as indicated in Table 39.

Documentation:

Appointment at the health centre is automatically initiated via a Ticket of Referral from MDH. The patients will be informed accordingly through an email and/or SMS.

Table 39: Orthopaedic clinics opening schedule

Health Centre	Day	Time
Floriana	Wednesday	3:00pm – 7:00pm
Mosta	Monday	3:00pm – 7:00pm
Vincent Moran Regional Hub	Friday Wednesday	3:00pm – 7:00pm 8:00am – 10:00pm
Qormi	Wednesday	8:00am – 12:00MD
	Monday Tuesday	8:20am – 10:00am 8:20am – 11:20am

Vascular Outpatient Clinic

The Vascular Outpatient Clinic is a joint initiative between the Primary Health Care Department and Mater Dei Hospital, providing specialized outpatient care to patients presenting with vascular-related conditions requiring assessment by a vascular surgeon. Patients may require follow-up appointments if deemed necessary by the vascular surgeon. Vascular outpatient sessions are available as indicated in Table 40.

Documentation:

Appointments are scheduled by the Client Support Centre following vetting by the Tissue Viability Practice Nurse. Vetting is carried out following a referral received from any healthcare professional requesting further input from a vascular specialist. Referrals should be sent to vascular.phc@gov.mt and must include the patient's details, contact number, presenting complaint, and a brief clinical history. Patients are contacted once their appointment has been scheduled.

Table 40: Vascular clinic opening schedule

Health Centre	Day	Time
Hamrun Commiunity Clinic	Monday	8:00am – 1:00pm

4. Help Us to Help You

Our commitment depends on your support. We depend on you to:

- Do an appointment if this is indicated
- Be punctual for your appointment

- Inform the Clinic if you can't keep the appointment
 - Bring identification records and any other documents as indicated
 - Give the clinician all the details about your condition, any illnesses you may have had, past hospitalization, any medication being taking, any allergies and any other matter relating to your health.
 - Report unexpected changes in your condition to the clinician
 - Asking the clinician to explain again if you haven't fully understood the recommended course of action
 - Following the treatment plan recommended by the clinician
 - Taking responsibility for your actions if you refuse treatment or do not follow the clinician's instructions
- o *Provide feedback:* Our service is provided by a dedicated team of professionals but despite our best intentions we know that there is always room for improvement. We depend on you to point this out so that we can do better; o Communicate with us clearly and concisely in either Maltese or English;
 - o Treat our staff with the courtesy and respect that they deserve and with which you yourself should rightly expect to be treated.

5. Feedback & Complaints

We are committed to a 'Service of Excellence' and strive to bring about a continuous improvement of our service to you. We appreciate your feedback and any form of constructive criticism is very welcome as it would help us improve our services.

If you believe that we have made an error and/or that our staff has acted improperly or without the due level of care and attention, please contact us. In we would need your name and ID number together with dates and times of the incident so as to be able to investigate properly and come back to you. If you wish to remain anonymous, we will respect that, but the investigation would be limited, and we would not be able to give any feedback.

Feedback and complaints may be submitted through the following channels:

- Online:

by accessing our website at <https://primaryhealthcare.gov.mt/en/> or by calling on 21231231/25576100.

- In person:

By calling the Administration of the relevant health centre

When making a complaint you should:

- » Provides us with your full name and ID card/ passport number, telephone/ mobile number (for feedback) and e-mail address if available (unless you wish to remain anonymous) and the place, date and time the incident happened.
- » Specify what the problem/case is, being as concise as possible; and
- » Provide any additional information that you think may help us in our investigation to resolve your complaint.

When addressing complaints, we will:

- » Guarantee your confidentiality within the circle of the investigating team but obviously your personal details may be needed to ask staff for statements so as to be able to relate to the incident;
- » Refer your case to the Client Support Centre and will send you an acknowledgement within 2 working days;
- » Carry out an investigation on the problem / case and conclude this as speedily as possible. If the requested information entails that an investigation needs to be undertaken, then the earliest we can give you feedback is after 10 working days where we will also inform you if the case has been concluded or that the investigating board needs more time. The customer care team will keep you updated about the progress.
- » We will contact you with a report on our investigation into your complaint in no later than two weeks unless we would inform you beforehand that we need more time for investigation

If you are not satisfied with how your complaint was handled you have the option of escalating your grievance through other channels such as the Ombudsman, the Malta Arbitration Board or the Courts of Malta.

6. Commitment to Continuous Improvement

With the aim of a Service of Excellence and continuous improvement in mind this Charter will be reviewed at least once every 12 months to measure our performance in terms of the standards set out in this Charter as well as how we meet your expectations.

The review process will be based on:

- Assessment based on the Malta Public Service - Quality Customer Service Guiding Principles
- Government policy
- Operational data (e.g. services offered, service delivery, etc.)
- Benchmarking
- Iso Certification 9001:2015 QMS and 7101:2024 Healthcare Organisation Management

- Feedback
- Compliments/ Complaints
- Quality Service audits
- Mystery shopper programme

The results of the internal review process will be published and used as a basis for improving our service.

Quality of service standards relative to the services provided will be monitored and measured by an external independent body and governmental third-party. The results of such monitoring will be communicated with the CEO of PHC. Such results will be the basis for the overall service improvement.
